29 March 2012

Dear Dr Khan

This report outlines your patient feedback from the Improving Practice Questionnaire (IPQ). Your results have been illustrated in tables and graphs with associated benchmarks where applicable. Details of score calculation and statistical methods have been provided to help you in the interpretation and understanding of your results. You will also receive an A4 poster summarising your results and a certificate of completion which you may like to display to patients to indicate that you value their views in order to inform positive change within your practice.

If you are carrying out this survey in order to help meet the requirements of the patient participation directed enhanced service (DES) for GMS contract, a guidance template for discussion of these local survey findings and an action plan have been included which may help facilitate discussions with your patient reference group (PRG).

Please note that the scoring scale used to calculate the mean percentage scores was updated in October 2009 in line with feedback from practices and health professionals. This is explained in greater detail in the supporting documentation found at the end of this report. In this report any previous scores displayed will have been calculated using the new scale to be directly comparable with your current scores.

The format of this report has been updated, which we hope will provide you with a clearer picture of performance.

We hope these results give you useful feedback as to how patients rated the practice and its service, and provide you with a basis for reflection. In order for us to improve our services, we would be very grateful if you could complete and return the enclosed feedback form.

Please contact the office on 0845 5197493 or reports@cfep.co.uk if you require further information about your report.

Yours sincerely

Helen Powell
Survey Manager

Introduction

About the IPQ

The IPQ is a well-established questionnaire widely used in the UK.

Since 2004, over 3,000,000 patients have completed an IPQ providing valuable patient feedback to over 4,000 practices and over 16,000 health practitioners, many of these practices and health practitioners having completed the survey on more than one occasion.

Extensive published validation studies (please see <http://www.cfepsurveys.co.uk/library/publications.aspx>) have established that the IPQ is a reliable and sensitive tool: accurately measuring patient satisfaction in designated areas and is sensitive to change - if the IPQ is carried out on more than one occasion any change in patient perception of service can be clearly and reliably monitored.

This report outlines the feedback that has been collected and analysed from a sample of your patients. Full explanation on how to interpret this information can be found in the report. We hope that this feedback is useful and a basis for reflection.

A sample of the IPQ questionnaire is included at the end of this report for reference.

About the benchmarks

Benchmarks are a useful guide as to how your practice performed in relation to all the practices who have carried out an IPQ survey. Benchmark data provided relates to either all practices or according to practice list size (the practice list size benchmarks displayed in this report are representative of your practice), as we have established this plays a part in scores achieved. However, it should be noted that other factors such as geographical location and clinical setting may also affect scores and benchmarks may not always be truly representative. Furthermore as it is not mandatory for a practice to carry out an IPQ survey, benchmarks provided are effectively based on data collected from a *volunteer* sample. Volunteer samples often perform better than an 'average' sample which could make the benchmarks provided artificially high.

Your feedback

From the report you will be able to clearly pinpoint areas where you scored well and also those areas where you might feel that improvements may be needed. However, it is advisable to take time to assimilate all the feedback and to avoid scanning the report and noting specific scores on which too much emphasis can be placed. In fact, the clearest reflection of patient satisfaction can often be seen in the frequency and distribution of patient ratings and in their written comments.

A page by page guide to the interpretation of your report has been incorporated in the supporting documentation at the end of this report which you may find useful.

Other useful information

Together with your report you will receive:

- An A4 poster: to enable you to share the results of your local survey with the patients in your practice.
- A 'Guidance template for discussion of local findings and action plan': completion of which may help you meet the requirements of the patient participation directed enhanced services (DES) for GMS contract, if required.

-- no data available, question introduced in October 2009.

Please note that the scoring scale used to calculate the mean percentage scores was updated in October 2009 in line with feedback from practices and health professionals. This is explained in greater detail in the supporting documentation found at the end of this report. In this report any previous scores displayed will have been calculated using the new scale to be directly comparable with your current scores.

*Dates in the table relate to date of application to carry out the survey.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Comments about how the practice could improve

- No magazines!
- Newer environment, very old building needs updating.
- I want a pharmacy in the practice.
- This doctor is my best doctor in any surgery. I recommend them to all my friends.
- Better premises.
- Ok.
- Reception staff shouldn't be asking too many questions on why you need to see a doctor! Certain things are private and confidential. All reception staff are nice and polite but one member!
- By having more than one line in the morning.
- Longer opening hours!
- Really good.
- Quicker appointments, being able to speak on the phone.
- More communication is required in staff at reception to satisfy patients/customer. Reception staff should work and act as a team and should be responsible and able to cover each other and share responsibilities. Reception should be helpful and customers/patients focused and should understand customer's/patient's problems and maintain dignity. Waiting area should be kept neat and hygienic. Seating chairs should be cleaned every day.
- It's very cold! The phone is constantly busy therefore appointments made is poor!
- Put the radiator on - it's always cold in the waiting area. Give the room a make over as it's quite dull and boring. The room doesn't feel hygienic!
- The first contact point of staff should be listening and considerable on individual's needs. A politeness and listens is a key issue to successful service provided to practice.
- Answering the phone when ringing for an appointment.
- Don't like steps.
- More professional environment.
- Internet availability to book appointments.
- Want more facilities.
- I am happy with present facility.
- Keep going the same excellent way. God bless.
- I have moved from another practice because of poor service. I have found my experience very good at this practice.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Comments about how the doctor/nurse could improve

- Modern premises would help but it is the doctor. Not the place.
- This doctor is a good doctor for all my family thank you.
- More time with the doctor.
- Satisfactory.
- Ok.
- Happy.
- Doctor excellent!
- Just keep the same attitude forever.
- I really like this doctor, they are lovely and a very helpful person.
- Be a bit more sympathetic!
- They are very good.
- They are doing well.
- They are very intelligent. They look after our family properly, we all happy with them.
- They are a very good doctor, they are really concerned about their patients welfare.
- Nice one, love it.

Supporting documents

Details of score calculation

The score provided for each question in this questionnaire is the mean (average) value of all of the ratings from all patients who completed the question. It is expressed as a percentage - so the best possible score is 100%.

Example using data from your Q1 Opening hours satisfaction

Total number of patients responses = 100

Questionnaire rating scale	Poor	Fair	Good	Very Good	Excellent	Blank/spoilt
Number of ratings	2	6	20	42	29	1

Value assigned to each rating	0	25	50	75	100	n/a

$$\frac{(\text{number of Poor ratings} \times 0) + (\text{number of Fair ratings} \times 25) + (\text{number of Good ratings} \times 50) + (\text{number of Very Good ratings} \times 75) + (\text{number of Excellent ratings} \times 100)}{(\text{Total number of patient responses} - \text{number of blank/spoilt})} = \frac{(2 \times 0) + (6 \times 25) + (20 \times 50) + (42 \times 75) + (29 \times 100)}{(100 - 1)} = 7,200/99$$

Your mean percentage score for Q1 = 73%

Please note that the scoring scale used to calculate the mean percentage scores was updated in October 2009 in line with feedback from practices and health professionals. Prior to this time a -33 to 100 scale was used, where poor = -33.3333%, fair = 0%, good = 33.3333%, very good = 66.6667% and excellent = 100%.

Explanation of quartiles

In statistics a quartile is any one of the three values that divide data into four equal parts, each part represents ¼ of the sampled population.

Quartiles comprise:

- Lower quartile, below which lies the lowest 25% of the data
- The median, cuts the data set in half
- Upper quartile, above which lies the top 25% of the data

Please note that the benchmarks presented in this report are based on data obtained from a volunteer sample of practices, and as such may be artificially high.

Question	Your mean score (%)	Benchmark data (%)*				
		Min	Lower quartile	Median	Upper quartile	Max
Q1 Opening hours satisfaction	73	44	62	66	71	99

* Based on data from 3,027 practices surveyed between April 2008 and March 2011 with 25 or more responses.

Supporting documents

Page by page guide to the interpretation of your report

Page 1

The frequency distribution table (table 1) shows the number of patient ratings from poor to excellent and the number of 'blank/spoilt' responses for every question (a blank response is where a patient did not respond to the question and a spoilt response is where more than one tick box option was chosen or if the questionnaire was defaced). If these values are added up, for any one question, this will equate to the total number of patients surveyed (shown in the top right hand corner of the page). This table clearly shows the degree of satisfaction patients have with each aspect of the practice considered. Please note the spread of the ratings. Are they widely spread or closely packed around one or two specific ratings? One or two higher or lower ratings can make a big difference to your mean percentage scores illustrated in tables 2 and 3.

Page 2

The mean percentage score and benchmark table (table 2) illustrates your mean percentage scores for each question calculated from the data in table 1. Each score is the mean (average) score calculated from valid patient ratings (i.e. not the blank/spoilt responses) expressed as a percentage (see score calculation sheet also in the supporting document section of your report). It has been established by our statisticians that the reliability of your patient feedback for any one question may be marginally reduced if less than 25 valid patient responses is achieved (this number can be determined from table 1). In the event that there are less than 5 patient responses, the corresponding score for the question will not be illustrated.

Your scores have been displayed in colour coded boxes to indicate how your score falls within the benchmark data (within the highest 25%, the middle 50% or the lowest 25% of all the mean percentage scores achieved by all practices in the benchmark sample). The provenance of the benchmark data is provided in the footer below the table.

Graph 1 illustrates your mean percentage scores in ascending order of performance with benchmark means from all participating practices.

Page 3

Table 3 and graph 2 are the same as for page 2, but with benchmarks provided relevant to your practice list size. Evidence indicates that practices with smaller list sizes tend to perform better than those with larger list sizes.

Page 4

Table 4 shows the number of patient responses from each 'demographic' group detailed on the questionnaire i.e. age, gender, if the patient saw their usual practitioner or not and the number of years attending the practice. Demographic category mean percentage scores are calculated from all the ratings from all questions for that demographic group. Associated benchmark mean scores relevant to your practice list size are also provided. The same criteria concerning reliability of the feedback as explained in Page 2 above applies.

Page 5

Table 5 lists your current scores for each question together with scores from your last 3 surveys (if applicable) for comparison.

Page 6

Patient comments usually reflect scores achieved. The IPQ was designed to simulate the patient's chronological journey through their visit to the practice. Although the questions in the IPQ are generic, comments can pinpoint specific issues identified by the patient from any part of this journey. If there is a particular problem within the practice e.g. getting through in the morning on the telephone or the lack of chairs in the waiting room suitable for the elderly, this can be clearly picked up in the themes and frequency of comments.

In order to ensure patient anonymity, any personal identifiers are removed. In the unlikely event that we receive a written comment which might relate to serious professional misconduct (e.g. allegations of sexual assault), the comment would be referred to our Clinical Associate who would discuss the matter with you.

Improving Practice Questionnaire

OFFICE USE ONLY	Org ID
	Survey ID
	Practitioner ID

You can help this general practice improve its service

- This practice would welcome your honest feedback
- Please read and complete this survey after you have seen the
- No-one at the practice will be able to identify your personal responses
- Once completed, please return this survey to reception in the envelope provided

Please mark the box like this with a ball point pen. If you change your mind just cross out your old response and make your new choice.

When giving your feedback, please only consider the consultation you have had today.
